

Environmental Policy

Kelda Water Services (Defence) Ltd (KWSD) develop, manage and operate assets and systems for the supply of water and treatment of waste water to meet the requirements of the client (MoD) and legislation.

We recognise that our business is dependent on sustainable activities which drive efficient resource use and protect the environment. Therefore, we have a duty to act as responsible stewards of the environment. We foster partnerships with our clients, contractors and stakeholders to pursue this goal.

We commit ourselves to:

- Maintain compliance with all relevant environmental legislation, standards, guidance and contractual requirements.
- Drive continuous environmental improvement by establishing stretching objectives and targets and monitoring performance.
- Prevent environmental pollution by using the most suitable practices.
- Use energy and materials efficiently, and manage the disposal of waste responsibly.
- Improve biodiversity on our operating land and where our operations have an impact.
- Minimise our impact on water resources.
- Reduce the amount and therefore the environmental impact of employee miles.
- Ensure all employees, contractors and stakeholders understand their environmental responsibilities and impacts and do not undertake any activity that puts the health and safety of any individual at risk.
- Review the environmental policy and procedures periodically in light of new knowledge, changing legislation and client/public concerns to ensure they remain fully applicable.

We expect all employees and contractors to adopt and act upon the commitments held within this policy.
